

RESELLERS CAN OFFER THE BEST DEMONSTRATIONS SHOWING SPORTS SIMULATOR'S TECHNOLOGY WITH LITTLE INVESTMENT

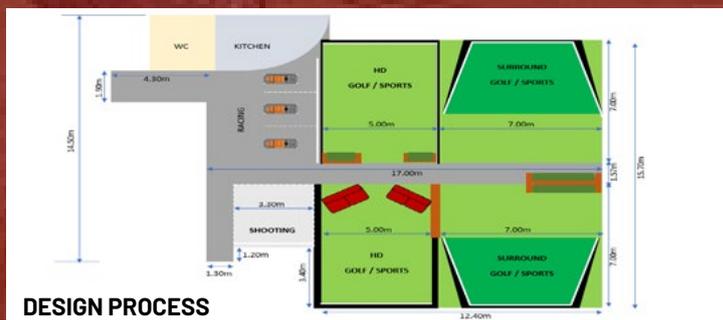

There are a few simple steps to being an Official Sports Simulator Reseller, with initial discussions taking place to determine the sales suitability of the simulators for a specific area. An online zoom meeting is arranged so it is fully understood the importance of visual demonstration when it comes to showcasing our products and features. This can be done with online discussions or ideally by visiting the factory, this allows you to get a complete understanding of the reasons for our successful trading of over 30 years. If resellers invest in just a decent laptop and projector they can do professional on-site presentations using the sports simulator programs, with 60+ Sports that can be shown alongside the 1,500+ Game Challenges and 3,500+ Sporting Venues. Utilising the enhanced interactive websites, which thoroughly explain Sports Playable, Sports by Country, Sports Analysis, Sporting Environments, Sports Play Connect, Sporting Calendars and Advertising & Branding. Various simulator models are available, with their customisable made-to-measure options, for the client's own facilities. Golfing establishments can be shown GSX Golf, GPS Golf and Contest Golf as part of the Sports Simulator, which is more advanced than any other Golf Simulator on the market. The website also explains the racing simulator, shooting simulator, technology, software, literature and the company history. However to really get customers confident in this exciting product range are the videos and the blog features, which show how lots of clients have benefited from our simulators around the world. When visiting the client's location the room sizes can be taken alongside images, enabling the Sports Simulator design team to give their expert opinion on the ideal setup. Demonstrations can also be organised remotely using Zoom or Teams, if travelling to the client's own locations is an issue. Remotely sharing the screens both the simulator programs and the interactive website can be presented. Once orders are placed the custom manufacturing takes place, the simulator is then shipped to the site and installed often with remote assistance and training. Contact us today to schedule your online presentation. Click to View the Sports Simulator Blog.
